

Figures for Lichtenburg

2/11/62

The Times

A Johannesburg sculptor, Mrs. LILY SACHS, has just completed work on a fountain in concrete which is to be erected in Lichtenburg, Western Transvaal. The fountain consists of an eight-foot column on which are four female figures in high relief. A shallow bowl, seven feet in diameter, will rest on the column. In the picture Mrs. Sachs is seen with two of the completed figures.
